New York University Oct. 11. 1852

Dear Sir

I have received your Circular announcing your intention to publish a new periodical and enquiring whether I shall be able occasionally to contribute an article. In reply I have to state that it would afford me great pleasure to contribute to your magazine, and I am not without hope that I may be able to do so; but I am now engaged upon a work which requires all the spare time I can devote to it, so that for some months to come I cannot promise myself much leisure for new engagements.

I am with much respect

Yours truly

Elia Loomis
